PROJECTS

PAY ME CONNOR

Pay Me Connor is a mobile app that allows users to track bills and payments between roommates. The app is built in React Native and talks to an Express server hosted on Heroku. The following link is for the front-end repo.

github.com/Pleeper228/pay-me-connor-client

DUMPR

Dumpr is an app that lets users add the locations of bathrooms and rate their quality. Think Yelp for bathrooms. This repo is for the client side express app hosted on Heroku.
